InTournament (Integrated Tournament)

- InTournament was written by and for Kreider PCTournaments. Based on 50+ combined years of experience we believe we know how tournaments should be managed. Every tournament has its own characteristics, but the basics are the same.
- The user interface is very easy to use. We specifically designed it that way. The tournament management program is designed to get a tournament setup and running quickly and efficiently.
- InTournament's reports may be saved as PDF, HTML, Microsoft Excel®, text, Quattro Pro®, RTF, etc. files. These options will provide the host school and the press the greatest flexibility in updating web sites.
- Adding wrestlers to and removing wrestlers from a tournament is simplified. InTournament uses a spreadsheet to do the work. Working with spreadsheets is easy. We believe this is the best method to use. How many times has your tournament started late do to last minute changes? Most every tournament we manage start on time. Most changes consist of moving wrestlers from one weight class to another, scratches, and new entries. InTournament allows these changes to be made quickly and efficiently.
- InTournament uses a commercially developed client/server or local server database to manage the data. The advantage of the database is that the likelihood of the data being corrupted is extremely small.
- InTournament is incredibly stable, i.e. it doesn't crash.
- Integrated with the NWCA OPC System

PRODUCTS:

(All software runs on Win 9x,SE,ME,NT,2000, XP)

- InStats – Integrated Statistics \$125
- InDuals – Integrated Duals \$125
- InTournament – Integrated Tournament
- Tournament Size:
- 32 Teams \$100

InStats (Integrated Statistics)

- Integrated with the InTournament database.
- Keeps track of season and career for both JV and Varsity.
- Track matches for both duals and tournaments.
- Maintain records, e.g. top 10 wrestlers with most take downs in a season, career, historical, etc.
- **Generate season record report of all official and/or unofficial matches for a season with no retyping.**
- Easy statistics form entry.
- Multiple reports, e.g. season matches, seeding, scouting, team, individual, etc.
- Spreadsheet entry. Just like the wrestling score book form. Allows for viewing individual totals immediately.

Optional Client/Server Database:

The client/server database is **optional** and is purchased separately directly from Kreider PC Tournaments, LLC for Win NT/XP/2000 computers. All software includes a **FREE** local database. Please contact Kreider PC Tournaments for more information.

- Yes, I would like to know more about the Client/Server database.

InDuals (Integrated Duals)

- InDuals is designed to handle all of the data entry and reporting needs for a dual tournament.
- InDuals will handle both folk-style and free-style tournaments at the same time as well as a variety of different weight classes for each. It is even possible to setup multiple tournaments and do data entry at the same time. Each tournament may have as many sessions and/or sub-sessions as needed.
- It is the program used at the National Duals to provide the reports published on the Internet. All reports may be saved as PDF, RTF, and a variety of other formats.
